Rutgers Energy Institute - Fifth Annual Symposium

REI Annual Symposium

The Rutgers Energy Institute hosts a symposium every year in the spring. Speakers from academia, industry, and government will be hosted for keynote addresses on topics relating to energy science, engineering, economics, and policy.

The 2010 Energy Symposium by the Rutgers Energy Institute provided faculty, students, staff, government officials, and community members with the opportunity to learn about the new methods, processes, and initiatives being developed by energy thinkers at Rutgers, in New Jersey, and across the country.

If you are interested in participating in our next annual conference in 2011, please email Program Coordinator, Beatrice Birrer at bea@marine.rutgers.edu

Fifth Annual Symposium on Energy Innovation 2010

SPEAKERS: Gerald Stokes (Associate Laboratory Director for Global and Regional Solutions, Brookhaven National Laboratory), Michael Trachtenberg (CEO and CTO of Carbozyme), Michael Walsh (Executive Vice President Research, Chicago Climate Exchange), and Stephen Mayfield (Director, San Diego Center for Algae Biotechnology, UCSD and co-founder of Sapphire Energy).

-
REI Director, Paul Falkowski, presentation - See on Scribd - Welcome and Introduction on YouTube

- Gerald Stokes presentation "The Challenge of Implementation: the New York State 80 by 50 Plan" - See on Scribd - View on YouTube

- Michael Trachtenberg presentation "Energy and Environment" - See on Scribd - View on YouTube

- Michael Walsh presentation "The Role of Exchanges and Standardization in Reducing Emissions at Scale" - See on Scribd - View on YouTube

- Stephen Mayfield presentation "The potential of micro-algae for the production of biofuels and bio-products"- See on Scribd - View on YouTube
